

Connection instructions

Updated 11/26/2020

Sound module C12, 2-3120

Module to connect external speakers for spoken messages in VAKA.

Introduction

C12 sound module is designed to give spoken messages when arming and disarming from VAKA. The C12 is equipped with a high-level output for driving passive speakers.

The messages that can be played are "Alarm activation started", "Alarm activation interrupted" and "The alarm is activated in ..." with countdown every full minute and the last 30 and 15 seconds.

Rev. 1 and 2 are used with B26.

Rev. 3 is used with B27.

Rev. 4 is used with B27 or B28.
